Systematic Feature Ablation Impact Across Regression and Classification
(Isolating Demographics, Clinical Clusters, Multimorbidity Composites, and Leave-One-Out Terms)
Full Observable Reference (11 Feat)
Demographics Only (Age + Sex)
Condition Clusters Alone (No Composites)
Clusters + Comorbidity Count
Clusters + Multimorbidity Penalty
Clusters + Age-by-Comorbidity Interaction
Without Multimorbidity Penalty (Leave-One-Out)
Without Age-by-Comorbidity Interaction (Leave-One-Out)
Without Multimorbidity & Interaction (Joint Removal)
Clinical Conditions Only (No Demographics)
Without Cardiovascular
Without Metabolic
Without Respiratory
Without Oncology
Without Musculoskeletal
Without Psychiatric Condition
